Section Appendix B and Appendix C **Page** B-1 to B-18 and C-1 to C-41 **Figure Table** NA

Category Name Requirements

Actionee HAIS

Sub Category

Subject Requirements Matrix

Description of Problem or Suggestion:

Appendix B and Appendix C map Level 3 requirements to Level 4 and Level 4 requirements to Level 3 respectively. It is seen that: 1. In addition to the F&PRS, Specifications from SDS (System Design Specifications), TRMM, V0, UR(User Requirement Data Base) were included as Level 3 requirements for mapping purposes. (See pages B-16 to B-18) 2. Many L-4 requirements, including the performance requirements for the data server, were not allotted to any release so far (p C-6, 7, 12, 21, 24 etc.).

Originator's Recommendation

1. All L-4 requirements should be traced to L-3 requirements in F&PRS.
2. All L-4 requirements should be allotted to a specific Release.

HAIS Response Date 5/16/95

1. L4 external interface requirements must be traced to the IRDs since their parent requirements are in the IRDs (which derive from the F&PRS).
2. We agree to remove the traces to the SDS from this matrix.
3. We will correct the release mappings so that all L4 requirements to a specific release.
4. We have been asked to maintain traces to the URDB as applicable to document the close-out of URDB actions. These mappings will be retained. They complement (but to not replace) L3 mappings.
